Roro : Your personal safety companion

Roro is your personal safety app that works by sending an alert, without using your phone, to your guardians when you miss a check-in. Roro's patent pending tech is coercion-proof and works to keep you safe. No logins, no information leak, no snooping.

Roro Features

Simple safety design

Roro alerts guardians you choose when you miss a check-in or use the danger code. Simple and efficient.

Intervention free alert

Battery-dead, no signal, phone broken; no problem. Roro is intervention free and will send an alert to your guardians.

Coercion proof

Alert your guardians using danger code if you're forced to check-in in a hostile situation.

Privacy first

Your private information belongs only to you. Roro does not need or ask for personal identifying information.
